

**To assist small businesses in implementing such measures, below is a list of free tools and resources available to get started.**

1. [Small Business Cyber Security Guide](#)  
Australian Cyber Security Centre's Small Business Cyber Security Guide has been developed to help businesses protect themselves from the most common cyber security incidents.
2. [Cybersecurity Toolkit for Small Business](#)  
The Australian Cyber Collaboration Centre's Cybersecurity Toolkit provides a range of tools and services to protect businesses from cyber threats.
3. [Cyber Clinics SA](#)  
The Australian Cyber Collaboration Centre, AustCyber SA Node and the Department for Industry, Innovation and Science have partnered together to provide free 45-minute cyber consultations with an experienced cyber security advisor to discuss cyber security threats, risks, tools and the steps required to build a cyber-resilient business.
4. ['Have you been hacked?' online tool](#)  
Australian Cyber Security Centre's 'Have you been hacked?' online tool provides advice about what to do if a business thinks they are the victim of a cybercrime.
5. [Have I been pwned? online tool](#)  
Provides a search function to check whether an email or phone has been involved in a data breach.
6. ['How cyber secure are you?' online quiz](#)  
Australian Cyber Security Centre's 3 minute survey to understand the gaps in a business' cyber security.
7. [ReportCyber](#)  
Report a cybercrime, incident or vulnerability via Australian Cyber Security Centre's online reporting platform.

For more information on how to become more cyber secure, visit the [Australian Cyber Security Centre](#).
